Pixel Composer is a 3D pixel animation node based editor/renderer. It can be used as a stand alone application or loaded as an addon to Blender to create new 3D models and animations. The tool can be used to create models for games or movie projects, or to perform certain in-game tasks, and operates on a familiar node based interface. The 3D models created with the tool are natively compatible with any 3D modeling software. Features: * 3D CTF - Create your own 3D models in the most intuitive 3D modeling package - Blender * PIXEL EDIT - Work on your models without needing to export them to a different software * MESH EDIT - New amazing mesh sculpting tools for creating more complex models. Be creative and original with every tool * TARGET EDIT - Build working animation sequences for your 3D models, and save the scene as a standalone scene file * CTF COMPRESSOR - Compact your models for faster loading and less space usage * SCENE - You can easily create your own scene editor to organize your scenes * AMBIENCE - Generate lighting to add atmosphere to your models. Select from a wide range of lighting and surfaces * GESTURE - The gesture editor allows you to create custom animations easily * SURFACE - Use the surface editor to place the surface of your model as a texture on your 3D model * CTF EVALUATOR - Perform a test of your 3D models to see if they are ready to be used in games. How to install Pixel Composer: 1. Download and unpack the archive 2. Extract the archive, and run the executable 3. In the start menu, select "Start menu -> Program files -> Pixel Composer -> Pixel Composer" 4. Run the program 5. In the home tab, add the desired source files 6. Use the tools and drag-drop nodes to achieve the desired effect 7. Export your 3D models to a 3D software of your choice 8. Use the scene tab to create your own scene editor, or import a 3D model from a 3D software 9. Render your scene as you would normally do with any 3D software 10. Save the rendered 3D model as a standalone scene file in your chosen 3D software 11. Upload the scene file to your desired platform 12. Enjoy your work Minecraft Pixel Composer Pack/

Pixel Composer is a visual effects tool which makes pixel art usable for more than the typical hobbyist. With its help, you can change colors, apply various visual effects, and make more complex art. All the tools are unified in one interface, and are for the most part very intuitive. The powerful set of features and a gorgeous user interface make Pixel Composer a convenient tool to create your own visuals. If you are looking for a tool to further develop your pixel art into an even better quality, then Pixel Composer is definitely worth a try. Particle effects can look amazing on your games but are a pain to implement. This article shows you how to create custom particle effects in Unity with the help of a plugin. The plugin (I will link to it here) is called Itch-O-Matic and allows you to create cool particle effects in Unity. It is 100% free for personal and commercial use and the source code is also released for any user to read and build upon. I will start off by explaining what the Itch-O-Matic is, then show you the different particle effects that you can make using the plugin, then I will move on to explain how to make your own custom particles and effects. What is Itch-O-Matic? Itch-O-Matic is a plugin for Unity that creates cool particle effects in your game. It takes either input from your game or directly inputs in an image file, and creates an amazing looking effect out of it. With Itch-O-Matic, you can create particles that look like this: or this: Or make your own particles that look like this: The plugin comes with several effects pre-created. I will show you all the available effects and how to use them in the next section. How to use the effects? There are 5 effects in the plugin and all of them can be used in the game. I will explain the effects in the order that they appear in the menu. The first effect is called the Star Effect and I will show you how to use it later on. The second effect is called the Instant Fire Effect. This effect can be used to make fire and sparks. The third effect is called the Bubble Effect and this effect can be used to make bubbles. The fourth effect is called the '+' Effect and I will show you how to make this effect later on. The fifth effect
