Business Contact Manager For Outlook 2010 Beta Free License Key

Business Contact Manager helps you manage the flow of business and connect with customers and suppliers. This integrated contact management program allows you to manage and view your contacts at a glance. You can have contact cards in a variety of layouts and easily change and group them to suit your needs. Using Quick Find, you can access an additional 8 million contacts without leaving the contact card you're currently working on. You can also use these Quick Find features to search through the Internet to access new and updated contacts. Business Contact Manager includes a powerful contact management solution. You can view your contacts by business, group, category, and location, and you can search by full name, company name, or phone number. You can also connect with your customers and suppliers by opening multiple email accounts. You can also manage your contacts from anywhere with the built-in contact card viewer that displays your contact card in the current email you are viewing. With this feature, you can organize your contacts by groups and categories, and you can filter your view using filters that you define. You can also sort your contact list by name, email address, company, phone number, or fax number. You can use Microsoft Office Contact Card Control to create your own custom contact card layouts, then you can share them with your contacts. You can create up to 16 layouts and you can choose from a variety of layouts including filters and detailed information. You can even use Business Contact Manager for Outlook to synchronize contacts between multiple devices. The synchronization software allows you to synchronize contacts with your Palm OS, Windows Mobile, Pocket PC, and Windows CE-based devices. You can also send a contact card as an Outlook email attachment, or as a Printable format for people who have printers connected to the network. You can even print your contact card from a web browser. Fully integrate your contacts with Microsoft Office with Business Contact Manager for Outlook 2010. You can synchronize contacts with Microsoft Excel, Microsoft PowerPoint, and Microsoft Access. You can print your contacts with Business Contact Manager for Outlook 2010. You can even save your contacts to an HTML document for sharing via email. Business Contact Manager for Outlook 2010 is included with Outlook 2010 for Windows, the Office 2010 suite of productivity applications. This product is not included with the Home and Business editions of Microsoft Office 2010. Key features include:

- Manage your business and personal contacts - View and organize your contacts by category, location, business, and group.
- Save time when searching and viewing your contacts

What's New in the Business Contact Manager For Outlook 2010 Beta?

Business Contact Manager (BCM) and Business Contact Manager for Outlook 2010 are business and project management tools for Microsoft Outlook. BCM for Outlook 2010 offers functionality to plan, manage and track contacts, appointments and events. The package integrates with Microsoft Outlook contacts, appointments and events and with the address book to make organizing, managing and sharing business information easy. It provides a range of powerful business-oriented features for project management, productivity planning, client relationship management, and other related areas. Business Contact Manager for Outlook 2010 does not include the Outlook interface and can not be used as a standalone product. You can use Business Contact Manager for Outlook 2010 together with your current Outlook in one folder. Key features:

- Business Contact Manager for Outlook 2010 is an integrated suite for managing contacts, appointments, events, tasks, notes and notes to tasks in Microsoft Outlook 2007 or 2010. BCM 2010 is a single, integrated application that integrates with contacts, appointments, events, tasks and notes.
- BCM for Outlook 2010 helps you to plan, organize, track, and manage your contacts, appointments, events, and tasks, as well as tasks and notes to contacts, appointments, events and notes, with ease. BCM for Outlook 2010 includes all the features in the software release package for Business Contact Manager for Outlook 2010. It is easy to install and use.
- The calendar is used to create appointments, reminders, and to track your events. The Contact View allows you to see your Contacts, Enrollments, Tasks and Notes.
- Tasks have their own view. You can easily see all your tasks for a client or a project. It also provides a feature to assign tasks to another user.
- Notes are useful for tracking your notes. They can be used for a project or any other topic.
- Business Contact Manager for Outlook 2010 is a single, integrated suite for managing contacts, appointments, events, tasks and notes in Microsoft Outlook. This suite is easier to use than having to use multiple software packages to manage contacts, appointments, events, tasks and notes in multiple software applications.
- You can combine Contacts, Appointments, Events, Tasks and Notes for projects or for any other purpose in Business Contact Manager for Outlook 2010. You can even combine Contacts, Appointments, Events, Tasks and Notes with Contacts, Contacts, Appointments, Events, Tasks and Notes in the same project.
- Business Contact Manager for Outlook 2010 lets you track a project. You can link your appointments, contacts and notes to the project.
- You can easily copy, paste, drag and drop your Contacts, Appointments, Events, Tasks and Notes to a file, folder or any other folder in Business
